RUKRA EMERGENCY POWER SUPPLY

The RUKRA emergency power supply is designed to be used in elevator installations. If the 230 volt power supply is no longer present the 12V DC output will be activated immediately while the other output constant 12 VDC power supply issues.

The battery is charged with 13.6 volts by the charging circuit, the charging current will be more or less depending if the battery is full or empty. So you always have a fully charged battery.

TECHNICALL

- Power supply: 230 VAC / 50Hz
- Battery: 12V / 1,3Ah
- Output: 12VDC / 200mA (± 3 h) / 1A temporarily (± 1 hour)
- 1 x Output emergency light
- 1 x Output constant 12VDC
- Working temperature: -10 °/50 °
- Housing: ABS Plastic
- Sizes: 196 x 90 x 67mm
- Article number: RK-5004
