With behind COP module: RK-1600

RUKRA UNIVERSAL INTERCOM

If an elevator has a lifting height of 30 meters or more and / or the machineroom is not in an open connection with the elevator car then an intercom must be present in order to communicate from the machineroom with the people in the elevator cabin.

The RUKRA universal machineroom intercom can meet these requirements.

- 2-wire intercom system
- Easy installation
- Compact intercom speak module behind the COP with input for Normally open (N.Ö.) button
- Speak Module on the elevator cabinroof with integrated alarm button
