- Lighting specs.
 - Luminous flux 100%: 2400LM
 - Luminous Flux 20%: 500Lm
 - Power light 100%: 30Watt
 - Power light 20%: 7Watt
 - Light color (CCT) options: 3000K OR 4000K
 - color:> 80
- Supply voltage: 230V AC
- Motion Sensor (PIR)
 - Mounting: Luminaire front
 - Detection angle: 3600
 - Detection height: 5 m
 - Delay time: 1 minute
- Emergency
 - Minimum running time: 3 hours
 - Battery Type: Ni-MH
 - Capacity: 2000mAh
 - Charging time (fast): 2.3uur
 - Power charger included: 3Watt
- Article number: RK-3030

DURABLE **AND**
MAINTENANCE FREE

RUKRA LED ARMATURE

The RUKRA LED Armature is equipped with its own back-up battery and is very energy efficient. Especially in elevator cabin's where the light is on 24 hours a day directly energy saving is realized. You save energy because the LED dims when nobody is present in the elevator car.

Once someone enters the elevator cabin the built-in motion sensor will detect this immediately and maintain illumination at normal strength.

LED lighting live much longer, at least 80,000 hours or up to 10 years! Significant cost savings in lighting energy, maintenance and replacement and ensure that your investment is often recouped within two years.
