

RUKRA PROGRAMMER

With the RUKRA programmer you can easily program and testing the RUKRA Elevator Phone (and also other brands)

On the PSTN connection you connect a regular telephone and to the RUKRA Phone connector you connect the elevator phone (RJ-12 connector or a screw connector)

OPERATION

- Connect the phone and the Elevator phone to the programmer,
- Pick up the handset of the connected phone,
- Press the alarm button on the elevator phone (in cabin or up / below the cabin) until the set button activation time (± 5 seconds) has expired,
- Then there is a voice connection between the telephone and the lift telephone. Now you can talk / listen and programming.

Press on the phone #0000 and you are in the programming menu.

Download from www.rukra.eu the "short Program list" for the most common settings
