# RUKRA TALKER-4

**RUKRA Talker-4 speaks in combination with the RUKRA Elevator Phone voice messages to people in the elevator cabin and gives through speaking an address of the elevator through to the call center.**

The Talker-4 is supplied with a plug and play cable connected to the programming connector of the RUKRA elevator phone, there is no further power supply required.

The Talker-4 is equipped with three fixed voice messages (Voice messages can be customized), and you can record your own voice message about, for example the address of the elevator or the elevator number, this is only possible with computer and the program "RUKRA elevator setting"

**DURABLE AND  
MAINTENANCE FREE**
