RUKRA GPRS GSM MODEM

The RUKRA GPRS cellular modem is used in the Call Centre to send and receive text messages and for receiving the free emergency calls and service-call (3-day test) the call is not answered so it is FREE of charge.

The GPRS cellular modem is connected via a serial RS-232 cable to the serial COM port of the computer.

The modem is plug and play and there is no software to be installed.
